

NORTHSTAR COLLEGE

Academic Guide

Programmes, attendance, examinations, credits, and course requirements

FICTIONAL CLASSROOM DATA - NOT AN OFFICIAL COLLEGE POLICY

Knowledge-base ID: NSC-ACADEMIC-DEMO-2026

Academic year: 2026-27

Version: 1.0

Created only for the College AI Assistant RAG lab. All names, dates, amounts, contacts, and rules in this file are invented for learning.

1. Purpose and scope

This guide gives fictional academic rules for three programmes: B.Tech Computer Science and Engineering (B.Tech CSE), B.Sc Data Science, and Bachelor of Business Administration (BBA). The rules are designed so a RAG system can retrieve programme-specific passages.

Student-record boundary: this document contains policy information only. It does not contain any student's marks, attendance percentage, registered subjects, or examination result.

2. Programme summary

Programme	Normal duration	Credits required	Academic coordinator
B.Tech CSE	8 semesters	160 credits	School of Computing office
B.Sc Data Science	6 semesters	140 credits	Data Science programme office
BBA	6 semesters	120 credits	School of Management office

3. Credit-load rules

- A regular semester normally contains 18 to 24 credits.
- A student may request up to 27 credits after academic-adviser approval if the previous semester GPA is at least 8.0 and there is no active backlog.
- A student on academic probation is limited to 18 credits unless the programme office approves a recovery plan.
- Audit-only courses appear on the learning record but do not count toward the degree-credit total.

4. Attendance and examination eligibility

The minimum attendance required to write the end-semester examination is 75 percent in each registered course. Attendance is calculated separately for each course; an overall average does not replace the course-level requirement.

Attendance bands

Course attendance	Status	Fictional action
75% or above	Eligible	May write the end-semester examination if other requirements are met.
65% to 74.99%	Shortage	May submit one condonation request with supporting evidence before the published deadline.
Below 65%	Not eligible	Must repeat the course when it is next offered; condonation is not available.

Assessment pattern

- Theory course: 40 percent continuous assessment and 60 percent end-semester examination.
- Laboratory course: 60 percent continuous performance and 40 percent practical examination.
- A student must obtain at least 40 percent in the end-semester component and at least 50 percent overall to pass a course.

Backlog and re-examination

A failed course becomes a backlog. The student should register for the next available re-examination through the examination portal. A maximum of four active backlogs is allowed before the student must meet the programme coordinator to create an academic recovery plan.

5. Course registration and prerequisites

- Online registration opens ten calendar days before the first teaching day.
- The add/drop window closes at 5:00 p.m. on the fifth teaching day.
- A prerequisite course must be passed before registering for the dependent course unless the academic committee records a written exception.
- Timetable clashes are not approved. Students should contact their adviser before the add/drop deadline.

Programme-specific requirements

Programme	Major requirement	Final-stage requirement
B.Tech CSE	Data Structures is required before Algorithms; Database Systems is required before the Data Engineering elective.	Six-credit capstone across semesters 7 and 8, plus an approved 6-week internship.
B.Sc Data Science	Python Programming and Statistics I are required before Machine Learning Foundations.	Eight-credit applied analytics project in semester 6, plus a portfolio review.
BBA	Principles of Management is required before Strategic Management.	Six-credit industry project in semester 6 and 30 hours of community engagement.

6. Grading scale

Score	Letter grade	Grade point
90-100	O	10
80-89	A+	9
70-79	A	8
60-69	B+	7
55-59	B	6
50-54	C	5
Below 50	F	0

7. Academic support and escalation

- For course choice or prerequisite questions: contact the assigned faculty adviser.
- For attendance correction: first contact the course instructor within five working days of the displayed class record.
- For examination registration or hall-ticket problems: contact the Examination Cell.
- For a programme exception: submit a written request to the programme office; chatbot answers are not approvals.

8. Safe answers for the AI assistant

The assistant may explain the rules in this guide and identify the relevant office. It must not claim to know a student's current attendance, grades, backlog count, registered courses, or eligibility. Those values require an authenticated student information system.
